

Give me a DRAMA BRAIN RUSH, please!

starring Endorphin and the Polypeptides performing their theatrical smash hit in schools everywhere and brought to you by the Fine Arts trained teachers of Utah on behalf of the WHOLE CHILD.

Research is confirming that:

- **DRAMA is a powerful brain-compatible learning medium.**
- DRAMA students demonstrate higher emotional intelligence; including enhanced social/emotional skills, self-esteem, self-control, moral reasoning, empathy, etc., (causality studies).
- DRAMA students demonstrate higher achievement in reading comprehension and math (causality studies).
- DRAMA students demonstrate higher verbal skills – expression and performance (causality studies).
- DRAMA students demonstrate less juvenile delinquency and lower drop out rates. (causality/correlation studies).
- DRAMA students demonstrate higher tolerance toward human diversity; e.g. students are less likely to endorse racist remarks and attitudes than other students; students demonstrate higher rates of rehabilitation when assigned to drama rehab programs following successful criminal prosecution (causality studies).
